Dxbox RT/CT

Real Time Radiography/ Computed Tomography System

Dxbox-150-CT

XRIS
X-RAY IMAGING SOLUTIONS

APPLICATIONS

‣ Stationary system for real time and CT inspections

‣ High speed routine work for quality control of various applications

‣ Castings, weldings, composite materials, medical equipment, ballistic plates, additive manufacturing, archeological artefacts inspection
KEY FEATURES
|	
Real Time	**Dxbox RT** has been designed for real-time inspection. It is a high-end and user-friendly X-ray system, which comes with the acknowledged **Maestro** software.
Complex parts	**Dxbox RT** is particularly important for applications where the complexity of the parts or their requirements in quality are such that they must be X-rayed in many different angles to comply with all requested norms.
Radiography / Radioscopy	Combine digital radiography and radioscopy with a fantastic sensitivity, excellent signal to noise ratio (SNR) and unbeatable contrast sensitivity better than 1% (EN 462-1). Switch from video to radiography mode during the X-ray shot with automatic and fast averaging.
Upgrade	Thanks to high precision rotative support, **Dxbox RT** can be upgraded with **Maestro CT**.

Maestro SOFTWARE

All **Maestro** and **Maestro RT** features included.

Ask for **Maestro CT** module, with :

‣ Definition of reconstruction parameters

‣ 3D reconstruction from images acquired during a 360° rotation

‣ Volume visualisation, display of slices in **Maestro** main HMI

‣ Post-processing on slices thanks to all filters and features available in **Maestro**. These filters can be applied in real-time, so as to speed up the analysis
Dxbox RT/CT ACCESSORIES & SAFETY DEVICES

‣ Emergency stop, flashing lamp, safety relay, door switch,...

‣ Internal camera

‣ 4 wheels

‣ 4 lifting eyes

‣ Workstation

‣ Other options available upon request

‣ Up to 225 kV
