

X-ray DDA for silver film replacement in your **C**urrent **S**ystem

APPLICATIONS

- ▶ Weldings on pipes and plates
- ▶ Al, Fe, Ti, inconel and other alloys, plastic casting defects such as porosities, shrinkages and inclusions
- ▶ Honey combs structures, composite materials (wrinkles, inclusions, ...)
- ▶ Historical assets
- ▶ Forensic investigations

KEY FEATURES

Digital

Direct digital image on the computer screen (no manual process).
User-friendly thanks to very **intuitive Maestro** NDT software.
Post-processing with real time filters.
DICONDE, TIFF & JPG formats available.
Easy archiving & reporting.
Efficiency and profitability drastically increased.

Film -> digital radiography

Dereo RAD is the easiest tool to work with in order to switch from traditional X-ray films to digital radiology inspection.

X-ray video

X-ray video (1 fps scopy) for perfect and **rapid image adjustment** :
No more headaches about the kV and mA calculation.

Image quality

Excellent signal to noise ratio (SNR) and contrast resolution better than 1% (EN 462-1).
14 or 16 bit.
Automatic and fast averaging.
Different scintillator thickness available.

Quick set-up

Very easy set-up (plug & play) and use thanks to smart hard- and software features.

Compatible with any high energy sources

Electronics of **Dereo RAD** are very well shielded and protected from X-ray dose. Thanks to that, it works with any other kind of constant potential generator, gamma sources (Se, Ir, Co) as well as betatrons and linear accelerators. Synchronization is not needed. Delivery and installation is achieved very easily with existing generators at customer site.

Reinforced casing

In order to prevent scratches and knocks on the flat panel, **X-RIS** designed a reinforced casing which contains the DDA, a mains power supply, tough connectors, as well as the necessary lead shielding.
